The Top Five 5G Stocks as Selected by VectorVest

Hello,

Thank you for downloading The Top 5 5G Stocks as Selected by VectorVest. The 5G revolution is upon us! 5G will no doubt bring about a fair bit of change including:

- The way we work
- The reliability of the mobile internet world
- Our understanding of what is possible with higher internet speeds

The recent Ericsson Mobility Report 2020 had a very interesting graph noting forecasted 5G uptake:

Note: This graph does not include traffic generated by fixed wireless access (FWA) services

¹ www.cable.co.uk/mobiles/worldwide-data-pricing

² GlobalData, India Telecom Operators Country Intelligence Report (2019)

Ericsson Mobility Report 2020: <https://www.ericsson.com/en/mobility-report/reports>

Ericsson is one of many companies out there forecasting significant uptake in 5G. You can see it already taking place, keep a lookout for 5G phones and 5G advertisements as the 5G landscape develops further. Chances are that you will be using 5G soon!

This got us thinking at VectorVest...we got to work to identify some of the best stocks that are associated with 5G. Our research took us outside of Australia where we found some of the best 5G stocks in the world are currently in the US market. As such, this report breaks out 5 stocks from the US Market that really stand out. These stocks are not pure 5G players...but they are in the 5G space with plenty of fundamental and technical indicators currently in their favour.

Strict criteria have been set with the identification of these stocks. All the given stocks are not penny stocks, nor stocks with low volume trades each day.

The key overarching aspect applied to award the Top 5 5G Stocks as select by VectorVest—was Earnings (EPS). The EPS must be rising year in and year out for the last 3 years. This EPS profile will not agree with your broker. At VectorVest, we apply a 12-month leading forecast on earnings. I don't know of any other service that provides you with this. Companies that have a rapid rising set of forecast earnings, year in and year out...are companies that continue to rise in price. We have seen this year and year out over the years... no matter what exchange the stocks are offered on.

VectorVest has identified 5 such 5G stocks for 2020 where the earnings profiles have taken off. In fact, as a bonus, I am going to show you 5 such stocks for the US market which has some of the best 5G stocks in the world. You be the judge...per below.

The top 5 5G Stocks for the US Market as picked by VectorVest are as follows:

Company	Symbol	Price	RV	RS	RT	VST	EPS	GRT	CI	REC	Stop
NVIDIA Corp	NVDA	543.61	1.26	1.45	1.35	1.36	9.92	20	1.83	B	493.28

NVIDIA Corp	NVDA	Long	4/01/2016	\$32.40	543.16	\$157,451.97	\$511.21	1,577.69%

The Top 5 5G stocks as picked by VectorVest are up over 1,000% since the start of 2016 and up over 50% for 2020!*

The key to this performance has been the rising earnings taking place in 2020!

Here is the earnings profile since the start of 2020.... Notice how the 12-month leading forecast on Earnings (EPS) keeps rising!

Here is the profile again since 2016...EPS keeps on powering on!

These are only 5 such stocks...you can find many more using VectorVest. The key is to find those stocks with a smooth upward rising EPS. If you need any help, give our team a call on **Australia Toll Free: 1800 303 782** and the team can assist you in finding such stocks for the US market.

Ensure you get the most out of VectorVest. Below is a link to 10 key resources to getting started with VectorVest. Make sure you check out the great resources on offer!

AMD

AMD is involved in the gaming industry. Plenty of gaming enthusiasts are awaiting 5G to be offered via the cloud for their gaming. As such, analysts are forecasting earnings to boom. One only needs to graph AMD in VectorVest and check out the steady rising EPS over the years!

AMZN

Amazon has a partnership with Verizon (ticker symbol VZ). The partnership is offering 5G computing services through Amazon's cloud services. The service offered is called AWS Wavelength. Read more about it per this link:

<https://aws.amazon.com/wavelength/>

GOOGL

Google will be rolling out its 5G phones along with offering 5G cloud services. The cloud services will be offered to the computer gaming community. One such cloud service on offer is called: Stadia. Some interesting developments with Stadia...you can check out Stadia per this link: <https://stadia.google.com/>

MSFT

Microsoft is offering Azure as one of its key offerings for 5G. Azure is a cloud-based service that offers services including storage. Read up more per this link:

<https://searchcloudcomputing.techtarget.com/definition/Windows-Azure>

NVDA

NVDA makes computer chips which are required to run the cloud-based services. In addition, NVDA has entered the cloud services for gaming: GeForce. Some interesting gaming services on offer per the GeForce website:

Glossary of Key Indicators in this Report

Please note that in the VectorVest system any stock whose current price is below its Stop-Price gets an 'S' recommendation. This does not mean that VectorVest does not 'like' the stock, or that it should be sold immediately. However, it is a warning sign that the stock's price performance is weak. High RS stocks tend to have good price stability and do not fall below their Stop-Price very often. On the other hand, low RS stocks are generally very volatile and frequently fall below their Stop-Prices

EPS (Earnings per Share): EPS stands for leading 12 months Earnings Per Share. VectorVest determines this forecast from a combination of recent earnings performance and traditional fiscal and/or calendar year earnings forecasts.

GRT (Earnings Growth Rate): GRT reflects a company's one to three year forecasted earnings growth rate in percent per year. RS is an indicator of risk.

RV (Relative Value): is an indicator of long-term price appreciation potential. This indicator is far superior to a simple comparison of Price and Value because it is computed from an analysis of projected price appreciation three years out, AAA Corporate Bond Rates, and risk.

RS (Relative Safety): is computed from an analysis of the consistency and predictability of a company's financial performance, debt to equity ratio, sales volume, business longevity, price volatility and other factors.

RT (Relative Timing): analyses a stock's price trend. RT is computed from an analysis of the direction, magnitude, and dynamics of a stock's price movements day-over-day, week-over-week, quarter-over-quarter, and year-over-year. If a trend dissipates, RT will gravitate toward 1.00.

VST (Value-Safety-Timing): is the master indicator for ranking every stock in the VectorVest database. VST is computed from the square root of a weighted sum of the squares of RV, RS, and RT. Stocks with the highest VST ratings have the best combinations of Value, Safety and Timing.
