Creator of VectorVest

The Secret to Worry-Free Investing

How to secure safe income in a stormy market...

According to the U.S. Census Bureau, a shocking 96% of workers age 65 and older won't have enough money set aside to fund their retirements.

But don't worry. It's easier than you think to ensure your nest egg is up to the task.

The tools, techniques and strategies inside are designed to take the stress out of your investing...

So you can enjoy a worry-free retirement that will last a lifetime!

Discover Worry-Free Investing and Generate Income for Life!

Dear Fellow Investor,

The retirement crisis reports are overwhelming... CNBC, Forbes, USAToday and 60 Minutes have all run feature stories warning that Americans do not have enough money saved to maintain their lifestyle through retirement.

The U.S. census bureau says 96% won't have enough money put away. This means they will rely on Social Security, relatives and friends for financial assistance.

With the average social security benefit being *LESS than \$1,500 a month*, AARP reports that 40% of baby boomers plan to work well into their retirement years. They have given up on their retirement dreams. But you have...

The opportunity of a lifetime!

Learn how to generate steady income with your current retirement account and end *your* retirement worries for good. *Never be dependent on anyone else for your income. It's the secret to Worry-Free Investing!*

With VectorVest's system of dividend and stock analysis you'll have all the tools, training and information you'll ever

"Nothing Like It!"

Fantastic product, fantastic service. I've been trading for 13 years and have never come across ANYTHING like it before.

— Paul B., Wiltshire, UK

need to know which stocks to buy, when to buy them, and when to sell. *You'll be able to continuously generate steady monthly income for life.*

VectorVest automatically ranks WatchLists of Monthly Dividend Payers, DRIPS, MLPs and Blue Chip Bargains.

You get top-performing, ready-to-use scans that put rock-solid, growth and income stocks *at your fingertips*. Scans like Long-Term Winners, Premier Growth Stocks and Discounted Dividend Payers.

Tested and proven market timing guidance lets you know when it's *safe* to buy stocks and more importantly, when to STOP.

With one quick glance, you'll know what a stock is worth, how safe it is...and whether to buy, sell or hold...but you'll also know the dividend payout, yield and *safety* rating...there's even a master dividend indicator, YSG, that puts it all together for you.

And, you receive expert education via live webcasts and toll-free customer support.

This system has come to the rescue of tens of thousands of retiree investors *for more than 29 years*.

Sick of working hard only to earn pitiful returns?
Try VectorVest's Sure-Fire Success™ Trading Systems
— the legendary strategies that...

CRUSHED the Dow, Nasdaq and S&P by up to 756.3%

Say goodbye to armchair analysts with no "skin" in the game. Forget "free" tools from brokerage firms that never show you what you need to know. **VectorVest is the real secret to becoming a successful investor.**

Over 29 years in the making, VectorVest brings together everything you need to manage your portfolio — from cutting-edge tools to timely and unmistakable Buy, Sell and Hold recommendations.

What's more, VectorVest also includes our legendary Sure-Fire Success™ Trading Systems. And as you can clearly see in the graph to the right...

The results are absolutely outstanding!

From 11/1/07 to 2/5/16, the S&P gained 24.64%. The Dow did equally poor, up just 19.44%. And while the Nasdaq gained more, it still only rose 81.70%. Truly pitiful for a period spanning over eight years!

However, VectorVest's Sure-Fire Success™ Trading Systems did much, MUCH better.

During the same eight year period, VectorVest's Sure-Fire Success™ Trading Systems produced phenomenal returns of 146.24%... 168.46%... even 775.55%!

Today, VectorVest is more powerful and easier to use than ever. Because we never stop working to make it your ultimate investing resource.

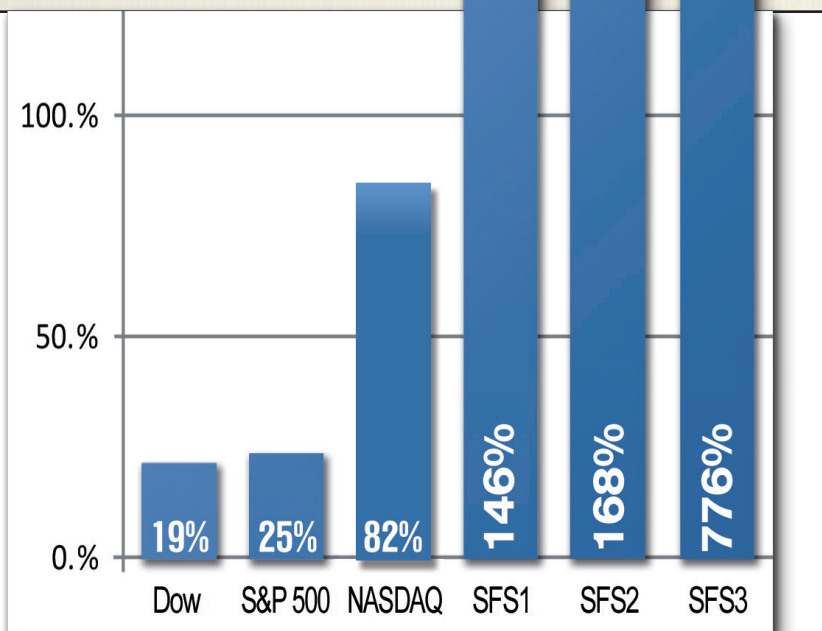

It's packed with straight-forward strategies... powerful tools... even a Getting Started video that walks you through the system and helps you get started quickly!

The fastest and easiest way to boost your portfolio's performance...

In the Getting Started video, you'll create a WatchList of your current stocks (*see page 16*), which you can use to quickly and easily boost your performance.

Simply punch in your stocks and VectorVest instantly analyzes them for Value, Safety and Timing. Then shows you which to keep and which to consider selling.

Easy enough for a novice, yet powerful enough to satisfy the most seasoned investor, it's the most important thing you can do to ensure your success!

11/1/07-2/5/16: While the Dow, NASDAQ and S&P produced profits, you could have returned two times, three times or even nine times your money using VectorVest's Sure-Fire Success™ Trading Systems!

That's enough to transform \$10,000 into \$24,624... \$50,000 into \$134,230... and \$100,000 into a whopping \$875,750!

Unleash the wealth-building power of Sure-Fire Success™

Like profits? Then you'll love our Sure-Fire Success™ Trading Systems. In head-to-head tests, they **crushed the S&P 775.75% to 24.64%.**

11/1/07 to 2/5/16 — In head-to-head tests VectorVest beat the S&P by 775.75% to 24.64%!

And as you'll see on page 5, our new Daily Action Plan makes using them as easy as 1-2-3!

Whether you're seeking safe stocks... hefty dividends... or spectacular triple-digit gains...

VectorVest gives you world-class tools and timing signals, automatic support and resistance levels...even the ability to safely test any strategy.

We've worked long and hard to make sure everything is as easy and user friendly as possible. So you can jump in and start making money right away!

Sincerely,

Bart A. DiLiddo

Bart A. DiLiddo, PhD, Creator of VectorVest

Meet the World's Leading Champion of Individual Investors...

Nobody works harder to help individual investors than Dr. Bart DiLiddo, creator of VectorVest.

- ▶ A former Executive Vice President of a Fortune 500 company, Dr. DiLiddo has over 50 years experience as an engineer, business executive, and investor.
- ▶ In the 1970s he began developing formulas to improve his investing results.
- ▶ By 1986, his investment earnings equaled those he earned as a Fortune 500 executive. So he retired and dedicated himself to helping other investors achieve similar success.
- ▶ That's when Dr. DiLiddo created VectorVest — the world's fastest, smartest and most successful investing software. His proprietary algorithms, formulas, and strategies have helped VectorVest empower, educate and enrich investors for over 29 years. *And called every major market move since 1991!*

Of course, Dr. DiLiddo didn't just create VectorVest. He uses it every day to manage his own portfolio!

Investing doesn't have to be stressful.
Because VectorVest gives you...

The Keys to Unlocking Sure-Fire Success!

If you're tired of getting uncertain returns from your investments, you're not alone. That's precisely the reason thousands of investors turn to VectorVest for help.

With VectorVest, you always know exactly what any investment is worth. As well as when to buy... what to buy... and when to sell.

And that's not all.

At VectorVest, we never cease working to make it easier for you to make money from your investments. So in addition to the best stock analysis in the industry, you also get strategies and searches you can easily customize to match your personal investing style — and virtually any market condition.

Some of our most popular ones have proven so consistently profitable, we've named them "Sure-Fire Success"™ Trading Systems.™ And do they ever live up to their name!

In a head-to-head test against the Dow, NASDAQ and S&P, VectorVest's Sure-Fire Success™ Trading Systems positively CRUSHED the competition a staggering 775.75% to 24.64%. (See page 3 for details.)

With gains like these, it's no surprise VectorVest customers went wild when we first introduced Sure-Fire Success™. Or why some began calling them "The Holy Grail of Investing!"

The Secret to Sure-Fire Success™

Just what exactly are these amazing systems?

In a nutshell, Sure-Fire Success™ Trading Systems are a collection of complete trading systems specifically designed, tested, and proven to make it easier than ever to make money in the stock market.

And while they're incredibly easy to use, don't let that fool you. They're powered by a highly specialized combination of VectorVest's proven algorithms for market timing and stock selection.

First, they let you know if and when it's safe to buy. Then they tell you exactly what to buy. They even give you specific stop losses to minimize your risk and maximize your gains.

As a result, they help you make money when the market is rising... moving sideways... even when the

market's going down!

These special systems are hands-down the best way to consistently—and dramatically—outperform the S&P 500. And they've proven it in more than 4,000 tests replicating nearly every market condition and scenario.

Including bull markets... bear markets... "sideways" years where the market barely moves... even flash crashes and market collapses.

In a moment, you'll see exactly how they work.

But first I want to remind you that, while Sure-Fire Success™ Trading Systems are new, *the VectorVest system* has been analyzing and ranking stocks for more than 29 years. And VectorVest subscribers have long known...

"These complete trading systems are hands-down the best way to consistently — and dramatically — outperform the S&P 500."

Here's what VectorVest subscribers have to say...

"Love the Sure-Fire Strategy!"

"Love the Sure-Fire Success™ strategy! For the first time ever, I have gains in every single holding. Keep up the great work... you've got a client for life!"

—Amy H., Wears Valley, TN

"Sure-Fire Success™ Works!"

"My own results confirm the Sure-Fire Success™ strategy does work in the real world. I'm up 41.5% in 7 months!"

—J.B., Wilton, CT

"Fantastic!"

"Your Sure-Fire Success™ Systems are the most fantastic thing I've seen in 20-plus years of investing. Don't change anything and keep doing what you are doing!"

—Ron M., Chandler, AZ

Identifying profit opportunities has never been easier!

Thanks to VectorVest's powerful algorithms and indicators, identifying opportunities couldn't be easier.

And one of the most important of these is called Relative Timing (RT).

The RT indicator identifies changes in price momentum otherwise almost impossible to detect. And it's so powerful it actually "senses" impending changes in price direction!

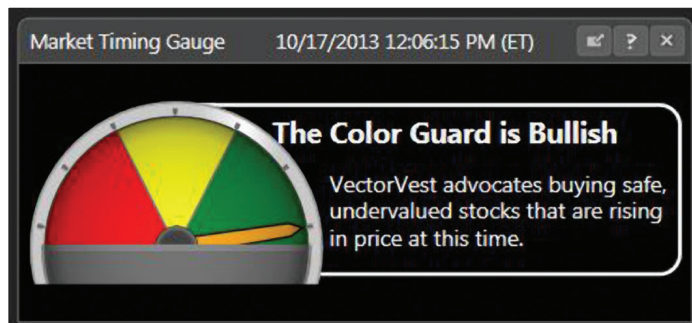

When price momentum speeds up, RT rises. When it slows down, RT falls accordingly. And RT is so quick to detect changes you even see when momentum is fading as the market hits all-time highs.

So you're protected from sudden crashes and changes in market direction!

VectorVest: Your secret weapon for executing perfectly timed trades.

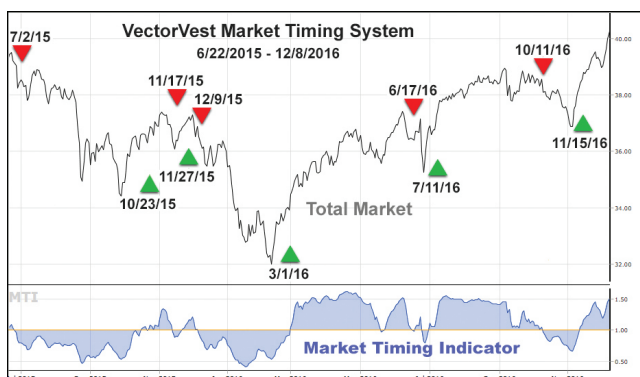

VectorVest is the only market timing system to correctly call every major market turn since 1991.

The Color Guard and other easy-to-read indicators show you when the market is gaining and losing momentum. You even get Market Timing graphs and nightly videos breaking down what the market is doing... and what you should do about it.

With VectorVest's Color Guard, you'll always know when it's safe to buy—and when it's not.

But knowing the market direction isn't enough. After all, stocks can rise right up to the moment they drop off the edge of a cliff.

Spotting trends has never been easier!
VectorVest's powerful market timing system tells you exactly when it's safe to buy stocks... and when to take your profits off the table.

Fortunately, VectorVest has you covered there too.

Whenever a market rally starts to fail, VectorVest signals the Downturn before all your profits go up in smoke!

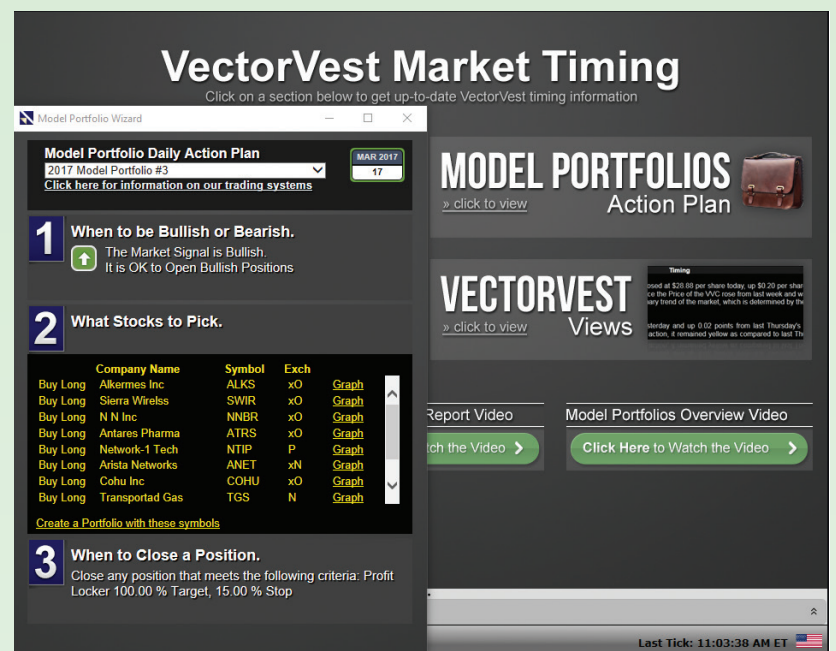

VectorVest's complete trading systems remove the guesswork from investing!

Our complete trading systems literally do all the hard work for you.

Simply fire up VectorVest, go to your Timing tab, and click the Model Portfolios Daily Action Plan. It shows you if the market is Bearish, Neutral or Bullish... which stocks to buy... even which positions to close. It's that easy!

(Continued on page 6...)

Model Portfolios Daily Action Plan!

With VectorVest's Model Portfolios Daily Action Plan, you always know when to buy, what to buy, and when to sell.

Step 1: Is it safe to buy?

Your first step in achieving Sure-Fire Success™ is to determine if market conditions are safe to buy. To do so, simply check your Daily Action Plan. If the market is bearish or neutral, it warns you and recommends appropriate measures. And if conditions are bullish...

Step 2: Which stocks to buy?

Once you know it's safe to buy, select a Sure-Fire Success search from the list provided. You'll promptly be shown a list of ideal stocks, ranked from best to worst.

Step 3: Any positions to close?

Your final step is to note the protective stop-loss provided and close out any positions that meet the stop criteria you set when you opened them. This way you control your losses before they damage your portfolio... and take well-deserved profits off the table!

How would you like to pick Long-Term Winners with 98% accuracy?

A fundamental law of investing is that in order to make money, you must control your losses. And thanks to VectorVest, this has never been easier.

After 4,697 historical tests, VectorVest's top-rated stocks by its **Safety Indicator** showed an **astonishing success rate of 98.38%! And this with an average gain of 107.85%!** The worst Annualized Rate of Return was a measly -4.41%.

And this wasn't just in prime market conditions. The tests spanned some of the worst market conditions imaginable.

Of course, as amazing as they are, this success rate is only part of the story. The aptly named **Long-Term Winners Strategy** also produced an *average* Annualized Rate of Return (ARR) of 10.72% without any management... with some reaching as high as 31.36%!

And these amazing stocks are only a click away.

Long-Term Winners Equals Bigger Returns!

5/13/96 - 12/31/15	Runs	Winners	Win %
Test Runs	4,697	4,621	98.38%
# Trades	93,940	71,957	76.60%
Avg Gain			107.85%
Avg Ann. RR			10.72%
S&P 500 Avg Ann			7.89%

Before unveiling its new Long-Term Winners Strategy, VectorVest subjected it to 4,697 historical tests. It passed with flying colors, producing a success rate of 98.38%. Incredible, considering the challenging markets occurring since 1996.

The secret to enjoying your ideal retirement is buying stocks that offer steady growth with absolute minimum risk. Legacy stocks that you can own for a lifetime, then pass to your kids for their retirement. **VectorVest has an incredibly simple system of identifying these stocks.**

(Continued on page 8...)

How VectorVest keeps you profitable in the safest stocks! ...letting you sleep soundly at night.

You're lying in bed at night, staring at the ceiling, worried about the hit your portfolio took today, and what it might do tomorrow.

You think, did I buy the wrong stocks? Did I buy at the wrong time? **Should I sell everything?** You want to make the right decision. You don't make to make a bad situation worse.

When you buy a stock, you want to know that you bought it at the right time. You want to know that the stock is safe and has a high likelihood to go up. And when you do sell it, you want to know you made the right decision.

You want to be confident that you know when to buy, what to buy and when to sell. You don't have a lot of time, so you need to do this fast. And you don't want to worry about it anymore.

VectorVest developed a Safety Indicator that does the work for you.

Worry-Free Investing is about buying stocks with great fundamentals. Those with a high likelihood of favorable earnings reports—*after* you own them.

If a stock's earnings go up year after year, even through brutal economic periods, you can be confident you have a **Long-Term Winner**.

Earnings consistency and predictability are key factors in assessing a stocks risk. Because information on stock safety is hard to find, VectorVest developed a **Safety Indicator** that does the work for you.

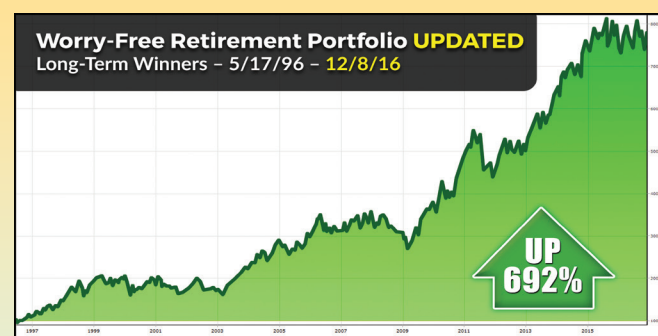

And the results are simply outstanding!

VectorVest created a **complete trading system** based on the Relative Safety Indicator, it's called Long-Term Winners, pictured below. **Up an incredible 692%** since 1996, averaging only 18 trades a year, it's your secret weapon for Worry-Free Investing.

With an annualized rate of return of 33.67% through trying economic times, it provides the capital appreciation your retirement portfolio needs, while keeping risk to a manageable minimum.

And that doesn't include dividends that average \$1.20, with a Dividend Yield of 1.7%. That's just the beginning of the income you could generate from this portfolio.

VectorVest has been teaching investors how to generate steady, reliable income for many years now, but we have never been more confident in a trading system than we are in **Long-Term Winners**.

Only VectorVest has a Safety Indicator that's so good it takes the worry out of your investing.

Say goodbye to guesswork forever!

With VectorVest you'll always know at a glance whether to buy, sell, or hold any investment...

Only VectorVest combines the raw power of fundamental valuation with the keen insights of technical analysis. It's the only system that accurately *times the market for you* to help you buy low and sell high.

VectorVest is also the only system to analyze, sort, rank and graph over 7,600 stocks daily for Value, Safety and Timing. And give a clear Buy, Sell or Hold recommendation to each stock every day.

What's more, VectorVest is bursting with strategies to help you quickly and easily adapt to market changes. It shows you how to use them, and even lets you historically test them to verify how they perform before you risk a dime.

But what really sets VectorVest head and shoulders above other services is how it takes the guesswork out of managing your portfolio.

Unbelievably Powerful... Amazingly Easy to Use

VectorVest is extremely powerful. Yet it's also incredibly easy to use.

You could even say VectorVest makes it easy to manage your portfolio. It saves you time and money by showing you precisely when to buy, what to buy, and when to sell.

So you can actually enjoy investing instead of spending hours trying to sort out winners from losers.

To see what I mean, take a look at the screen capture above. It shows the "Stock Viewer"—one of the most valuable tools in the entire VectorVest System. (And that's saying a lot!)

Even if you're a novice, this tool can have you investing like a seasoned professional in 10 minutes or less. Because it shows you instantly what a stock is worth, how safe it is and whether to buy, sell or hold.

How VectorVest Works

Every day, VectorVest analyzes each of the 7,600+ stocks with its proven Value, Safety and Timing formulas. Then ranks them using a simple 0.00 - 2.00 scale.

Ratings above 1.00 are favorable and ratings below 1.00 are not. It's that simple.

Unleash the Power of VST-Vector

VectorVest doesn't just rank stocks by Value, Safety and Timing. It also combines them into a master indicator called VST-Vector.

This powerful tool lets you find the absolute best combinations of value, safety and timing... all with a single click of the mouse!

Safety and Timing.

So it gave the company a "Buy" rating—as indicated by the green "B" in the

VectorVest makes it easy to pick great stocks!

Looking for the most undervalued stocks? The safest stocks? Stocks whose RT ratings show them the best to buy at this exact moment? No problem—consider it done!

- ❖ **Relative Value (RV)—What is the stock really worth?**
- ❖ **Relative Safety (RS)—How safe is the stock?**
- ❖ **Relative Timing (RT)—Is this the right time to buy?**

Recommendation (REC) column.

That same day, **Home Depot (HD)** received an RV of 1.21... an RS of 1.33... and an RT of 1.01.

Combined, these scores showed HD with good price potential going forward, good safety but lackluster momentum, so VectorVest gave it a "Hold" ("H") rating.

A third company, **Voxeljet AG (VJET)** received RV, RS, and RT ratings well below 1.00.

As a result, VectorVest identified VJET as a terrible stock — and warned subscribers by giving it a clear and unmistakable "Sell" ("S") Recommendation.

With clear signals like these, you'll always know when to buy, what to buy, and when to sell.

More powerful than ever. Even easier to use.
With the new and improved VectorVest System....

Successful Investing Has Never Been Easier!

Welcome to the world of successful investing!
For more than 29 years, investors have used VectorVest to take charge of their portfolios. And today, VectorVest is better than ever.

You get the industry's best stock, ETF, and market timing analysis. Along with powerful strategies, searches, tools, and much, much more. So you can...

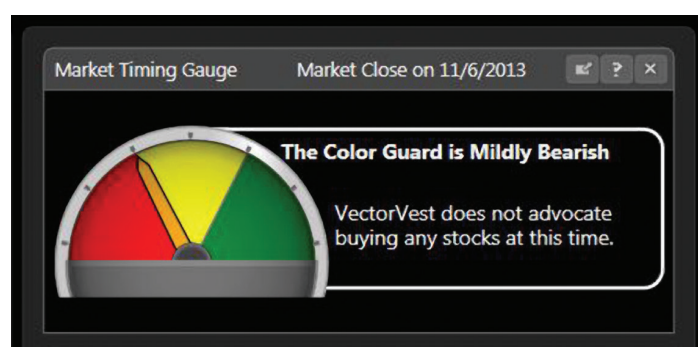

Instantly analyze stocks and ETFs!

VectorVest is powered by Dr. DiLiddo's proven proprietary algorithms developed and refined over more than 29 years.

Each day, they analyze and rank over 7,600 stocks—including more than 1,200 Exchange Traded Funds (ETFs)—for Value, Safety and Timing. So you always know whether to buy, sell, or hold any investment.

Always know whether it's safe to be in the market!

VectorVest's Color Guard clearly shows you when it's safe to buy and when to sit tight. And it's reviewed each evening in the Daily Color Guard Report video, so you'll always be on the right side of the market!

VectorVest's Color Guard ensures you always know which direction the market is moving.

And with VectorVest's proven market timing signals, you'll rest easily knowing you'll never be caught unaware by a sudden change in market direction. Because the system has called every major turn since 1991.

Easily master the VectorVest system, and strategies for every market condition!

You also get VectorVest's instructional videos, walkthroughs and webcasts. These show you how to use the system... implement proven strategies... even review current market conditions and reveal how to turn them to your advantage.

Investors love them. And it's easy to see why. Because they don't just help you become a more knowledgeable investor...

They also help you be more successful—by showing you how to stem your losses and increase your profits virtually overnight!

With Instructional Videos and Webcasts, making money with VectorVest is easier than ever!

Analyze your portfolio in 30 seconds!

VectorVest's WatchList tool makes managing your portfolio a piece of cake. It can analyze and rank all your

VectorVest's WatchList tool instantly reveals which stocks are hurting your portfolio's performance and which are the best.

Never miss an opportunity to profit or to limit your losses!

Another thing you'll love about VectorVest is its Instant Alerts—because they tell instantly when your portfolio needs attention and action!

This means you'll never have to worry about missing an opportunity to profit... or of being caught unprepared by unexpected market events.

With VectorVest's built-in Instant Alerts, you'll always stay on top of events impacting your portfolio.

"VectorVest makes me money"

"When I work with VectorVest, I make money. When I ignore its advice, I don't. It's really that simple."

— Robert P., Montreal, Quebec

Your 5 Week Trial is just \$9.95!

Prove to Yourself VectorVest Works Without Risking a Penny!

We at VectorVest have absolutely nothing to hide. So right now you can try our system risk-free for 5 weeks for just \$9.95. And prove to yourself its unrivaled wealth-building power without risking a single cent!

Simply call Toll-Free 1-888-658-7638 or go online to www.TryVectorVest.com. It's 100% Risk-Free, backed by Dr. DiLiddo's Iron-Clad Guarantee of Satisfaction. (See page 19.)

Once your VectorVest software is installed, just fire it up and follow the step-by-step instructions in the Getting Started video to create a WatchList and analyze your stocks.

You'll immediately know which ones are hurting your portfolio. And VectorVest can help you quickly find replacements to improve performance.

"Test Drive" VectorVest's Signals with a Virtual Portfolio

You don't even need to act on your VectorVest signals to verify how well they work. Because VectorVest also makes "Paper Trading" easier than ever.

Just create a virtual portfolio using the Portfolio Manager. Then update it whenever VectorVest issues a Buy or Sell signal. *You'll track gains and losses in real time — without risking a penny!*

Another way to prove VectorVest works...

Historical tests are another easy way to see the difference VectorVest can bring to your portfolio. So a BackTester tool is included with your trial to give you everything you need to test performance for yourself.

The BackTester shows how any strategy—yours or ours—would have performed during any period from 1996 to present. Simply pick your strategy, and *in just a few clicks you'll know exactly how much money you would have earned or lost.*

Past performance can't guarantee future results. But like professional sport coaches, savvy investors know the best way to test a strategy is to see it in action.

At VectorVest we want you to verify our results!

So go ahead. Claim your Risk-Free 5-Week Trial of the VectorVest System today for only \$9.95. And see how easy it is to make money in even the most volatile market.

Just be warned: Instead of asking for a refund, you might just kick yourself for not trying it sooner!

Claim your 5-Week Trial today for just \$9.95 and get over \$126 in FREE bonus gifts!

(See page 18 for details!)

How to Make Sure Your Nest Egg Never Runs Out of Money

Nearly half of all retirees outlive their retirement funds. VectorVest can help ensure it doesn't happen to you...

One of the biggest worries felt by aging investors is the fear of running out of money during retirement. And it's a valid concern. According to CNBC, *nearly half of all retirees will outlive their nest eggs.*

Fortunately, VectorVest can help ensure this scary scenario *never* happens to you.

By following three simple rules, you can build a retirement portfolio large enough to handle anything life throws at you.

These rules have worked for thousands of investors. And they can work for you, too...

Rule #1: Make sure you have the right tools to do the job.

Building a strong retirement portfolio is like building a house. It's extremely difficult to do unless you have the proper tools on hand.

You need a stock picking and trading system with a proven track record for delivering the results you need to make sure your nest egg doesn't run dry.

And track record is important. There's never a shortage of so-called experts claiming to predict the next big winner.

While some honestly do their homework, they may just be playing a hunch. Others push stocks not because they believe they're good investments, but because *they've been paid to promote them.*

They may pick a winner occasionally. But when they're wrong, YOU suffer the losses. And too many bad calls can bleed your portfolio dry.

However, with VectorVest you'll say goodbye to this stress. Because...

VectorVest takes the guesswork OUT of investing!

Every day, the VectorVest System automatically analyzes more than 7,600 stocks and ETFs using proprietary algorithms. Then gives each a clear Buy, Sell, or Hold signal.

By doing all the hard work for you, VectorVest helps eliminate your stress and worry.

You get signals based on proven computerized algorithms—not on hunches—continually refined over 29 years.

So you steer clear of emotional traps like holding on to a stock too long in hopes it will recover and repay your losses.

We're talking about *worry-free investing*. The only emotion involved is the rush you feel when your portfolio grows by leaps and bounds — often contrary to the rest of the market. Not to mention colleagues, friends and neighbors..

And as you make informed, logical decisions — based on accurate and timely data — you'll be amazed how easily you zero in on the safest and best stocks for your retirement portfolio!

Rule #2: Increase your winners by buying the safest, most undervalued stocks you can find.

When investing for retirement, always keep in mind your ultimate goal: To live off the money generated by your portfolio.

Never, *ever* lose sight of this! Every time you consider a new investment, ask yourself if it offers the right

"I retired three years early!"

"I love spending time with my granddaughter ... and I can because VectorVest helped me retire three years early!"

—Linda E., Apollo Beach, FL

"Thanks for the excellent advice!"

"Your indicators saved me tens of thousands of dollars. And my retirement would have been postponed by years without the benefit of your service!"

—K.S., Clearwater, MN

balance of safety, value, and potential gain to earn its place in your portfolio.

Your portfolio needs to generate enough income to cover all your expenses, no matter how much your cost of living goes up. Or how great your medical expenses become.

It should enable you to maintain your desired quality of life... help family through rough patches... and, of course, spoil your grandchildren.

Fortunately, VectorVest makes this easy by doing much more than analyze stocks.

You also get proven strategies and trading systems to help safely grow your portfolio. Including ones that seek out stocks with growing dividends from companies that can best afford to pay them.

Rule #3:

**Make more money
by making the trend your friend.**

Some experts claim there's no way to time the market.

But I say that's just a way of covering up their mistakes. Because for hundreds of years, savvy investors have known the secret to successful investing is doing just that.

That's why the third and most important rule of building a retirement portfolio is to make the trend your friend. Not once in a while, but with *each and every* investment.

Use a timing system that gets you in at the beginning of a rally. And more importantly, gets you out before your portfolio is killed as the market sells off.

One like VectorVest. That not only shows you what to buy, when to buy, and when to sell... but *shares the full history* of every timing call it's made. So you can review and verify performance for yourself.

(Continued on page 12...)

"I'd recommend VectorVest to anyone..."

"I've been trading for 13 years and have never come across ANYTHING like VectorVest. Fantastic product. Fantastic service. It's paid for itself many times over." – P.B., Wiltshire, UK

How to Heal a Broken Portfolio...

**A massive 2,177% increase
in performance!**

The market volatility of recent years wiped out millions of investors. Even today, many still struggle to recover and make up for years of market losses.

If this includes you, don't worry. You can still rebuild your portfolio — and VectorVest can help.

Simply log into VectorVest and create a WatchList of all the stocks in your portfolio (see page 16).

This will show which stocks are dragging down your portfolio. And by selling them, you'll immediately begin stemming your losses.

Of course, you'll want to find stocks to replace them — safe ones with solid values and strong upward trends. And again, VectorVest makes it easy.

Just click on VectorVest's Stock Viewer for over 7,600 stocks, sorted and ranked by VST-Vector, just like your WatchList. Then add the top-ranked stocks to your portfolio.

You'll see immediate improvement in your portfolio's performance. And by regularly repeating the process, you can continue to improve your results. It's that easy!

Here's the proof...

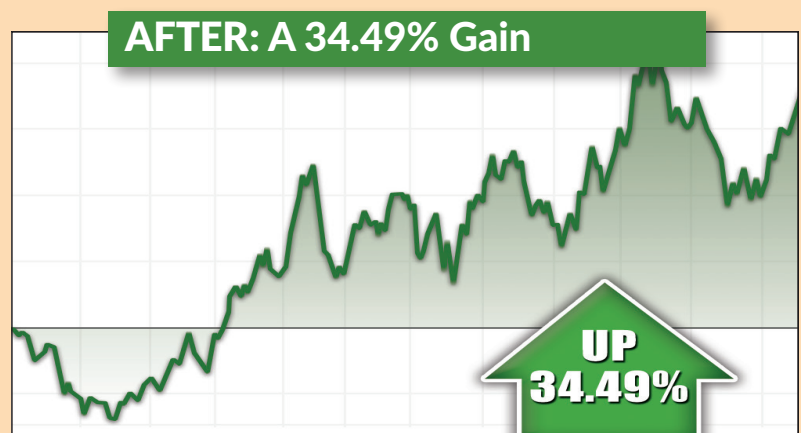

To the right are two graphs. The first shows a broken portfolio that included some well-known, commonly held stocks*. The second shows the same starting portfolio over the same period. But this time, its owner used the process above to weed out the stocks dragging it down. And replaced them with top-ranked stocks.

As you can clearly see, the results were MUCH better. Instead of a 1.66% loss, this portfolio produced a solid 34.49% GAIN. That's a massive 2,177% increase in performance!

VectorVest Turned Painful Losses Into Handsome Gains!

WITHOUT VECTORVEST: This broken portfolio never made money, tied up cash and produced a miserable 1.66% LOSS.

WITH VECTORVEST: The broken portfolio was turned around, producing a solid 34.49% GAIN!

How to Build a Low-Risk High-Yield Income Portfolio

Looking for steady income from your investments?
VectorVest makes it amazingly easy to find value stocks
that also pay you handsome dividends!

Capital gains can be a great way to make money from the stock market. But savvy investors know the best way to create an “Income” portfolio is to find stocks that go up in value AND offer handsome dividends.

And with VectorVest, finding them couldn't be easier.

VectorVest reveals which stocks offer both solid value and safe, generous dividends of 2%... 4%... even 7% or more. And with yields like these, you can transform any portfolio into a true money-making machine!

Imagine how great it would feel to generate multiple streams of steady, reliable income from your portfolio. Where each quarter — and in some cases, each month—you receive a dividend check from your investments.

And remember: This income is above and beyond any capital gains you collect. It's regularly scheduled, CASH paid to you by the companies as a reward for your investment.

You can use it to build (or even rebuild) your nest egg... enjoy the lifestyle you've always wanted... finance a hobby... put your children or grandchildren through college... or anything else you desire.

You can even use your dividends to scoop up extra shares at no out of pocket cost through **Dividend Reinvestment Programs (DRIPs)**. And by doing so, increase both your holdings and the amount of your dividend checks!

Of course, the key to creating a successful income portfolio is finding the right stocks. Which is why VectorVest...

Picks the best out of more than 3,400 dividend-paying stocks!

VectorVest is the only service in the world that gives you instant analysis of over 3,400 dividend-paying stocks. And helps you decide which are right for you by easily ranking them by dividend yield, dividend safety and dividend growth.

And don't forget: VectorVest updates its analysis daily so you always have the latest and most accurate information at your fingertips.

Talk about a system that empowers you to invest for retirement!

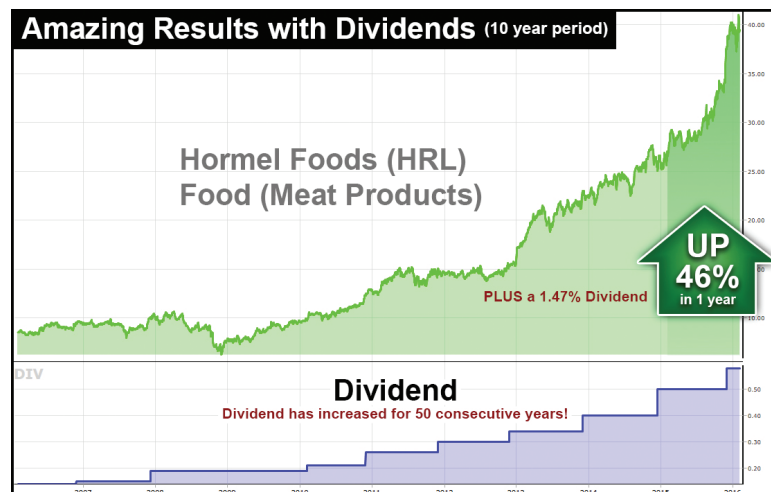

Here's an example of how it works...

Dividend Reinvestment Plans, or DRIPs, allow you to reinvest your cash dividends to buy shares commission-free at a discount.

With just a few clicks, you can open the Dividend Payers DRIP WatchList and return the 107 companies that have increased their dividend at least 25 years in a row!

Click on Relative Safety and you have the safest of the bunch at the top. On 2/12/2015, VectorVest issued a Confirmed Up market signal. The top Dividend Payer stock on that day was Hormel Foods. HRL has increased its dividend for 50 consecutive years!

Now there's a perfect stock for your income portfolio!

With instant access to VectorVest's expert analysis of more than 3,400 dividend-paying stocks, you'll never have trouble finding the right investments for your income portfolio!

Doubled my wife's IRA in 6 months!

“The results have been fantastic! I have had one 300% winner, three 100% winners, and numerous 20-50% winners. My wife's IRA is up 100%+ since December and my Roth is up 60%.”

—M.I., Annapolis, MD

Want even better results?

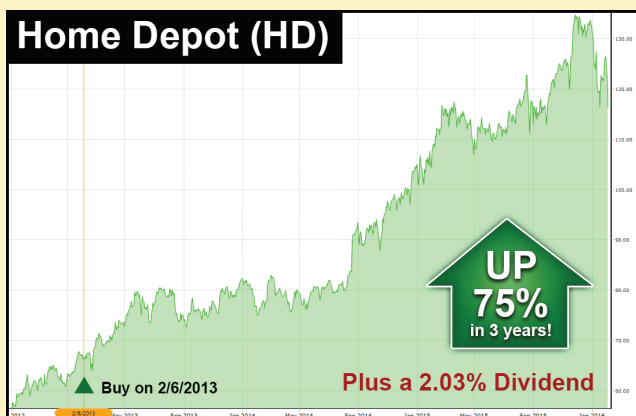

Supercharge your Income Portfolio with Specialized Strategies!

Nothing—I repeat, nothing—rivals the proven stock-picking power of VectorVest. Especially when you combine it with VectorVest's built-in dividend strategies like "Top Line Growers—Income."

This specialized search seeks out S&P 100 stocks that are growing Sales and Earnings. Stocks with the best combination of Safety and Dividend Yield float to the top of the list. The stocks pay on average a 3% dividend.

And by pinpointing exactly when they begin showing upward momentum, VectorVest turns them into perfect money-making opportunities!

Up 75% in 3 Years... Plus a 2.03% Dividend!

2/6/13 to 2/5/16—The Top Line Growers—Income strategy selected **Home Depot (HD)** at \$66.04 per share. It paid a 1.74% dividend... and rose to \$116.43 per share in 3 years—an impressive **75% gain!** Even the dividend grew—to 2.03%.

Up 24% in 5 Months... Plus a 3.66% Dividend!

8/24/15 to 2/5/16—When Top Line Growers—Income picked up **McDonalds (MCD)**, it offered a 3.66% dividend and cost \$92.87 per share. In three months, MCD rose to \$115.40 per share—a **24% gain!**

Up 142% in 3 Years... Plus a 5.25% Dividend!

2/6/13 to 2/5/16—Top Line Growers—Income returned **Lockheed Martin (LMT)** when it sold for \$86.70 per share and paid a 5.25% dividend. It rallied to \$211.94 per share... a **steady 142% gain in 3 years!**

Up 137% in 3 Years... Plus a 3.74% Dividend!

2/6/13 to 2/5/16—When Top Line Growers—Income purchased **Raytheon (RTN)**, it sold for \$53.14 per share and paid a 3.74% dividend. It promptly took off like a rocket, climbing to \$126.65 per share for a **137% gain in just three years!**

Your 5 Week Trial is just \$9.95!

Create your own income portfolio today with VectorVest!

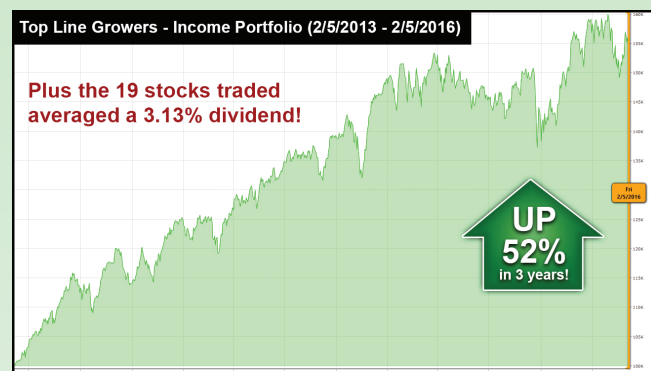

When it comes to taking charge of your portfolio, you won't find a better tool than VectorVest.

Every day, VectorVest analyzes and ranks more than 7,600 stocks for value, safety and timing—including over 3,400 dividend-paying stocks. And uses proprietary indicators to tell you which ones give you the best balance of Dividend Yield, Safety and Growth.

And today you can try VectorVest for five weeks for only \$9.95.

It's 100% Risk-Free. And when you act now, you'll receive more than \$126 in FREE bonus gifts...

See page 18 for details!

Income investing is easy with VectorVest!

Never Fear Market Volatility Again!

With VectorVest, you don't have to fear volatile markets any longer... you may even come to love them!

One of the most important things you need to know about investing is this: Market stability is just an illusion. The stark truth is...

The market is always volatile.

True, some periods are more volatile than others. The Dow may rise or fall gradually, gaining or losing a hundred points over a week. Or it might do so suddenly, surging or plunging hundreds of points in a single day.

But the fact remains, market volatility isn't some savage monster that rises up to wreak havoc only when we least expect it. It's always there, waiting just beneath the surface.

However, that doesn't mean you have to fear volatility. Savvy investors don't fear market ups and downs. They turn them to their advantage — and bank hefty profits in the process.

And you can, too. Because...

One of the greatest fallacies of investing is that it's impossible to 'time the market...'

Many experts and analysts — and probably your own broker — will tell you it's impossible to time the market. But this is NOT the case.

Timing the market isn't really all that difficult. You just have to know what to look for.

For example...

Let's say the market is bullish. It's been experiencing a strong upward trend for several months. And you want to know if you should stay in a bit longer... or get out and take your profits off the table.

In order to answer this, you need to do your research. You already know the overall market direction (up). But you also need to determine the momentum of this uptrend. Is it speeding up or slowing down? And by how much?

These are just a few of the indications that can help spot changes in market direction. And there are many. Because with few exceptions, the market does not reverse without warning. There are almost always abundant signs and signals things are about to change.

It's just that most investors don't know how to read them.

Investors using VectorVest, however, don't have this problem. VectorVest identifies the symptoms of volatility and gives you clear, actionable signals. So you always know when a market trend is speeding up, holding steady or slowing down —and when it could change direction abruptly.

You'll know when to take your profits off the table and get to safety. When to adjust your strategy. And when to

Always know which way the market is moving!

Market Direction is hands-down the most critical information any investor can have.

Brokers and fund managers tell us timing the market is no more than a myth. But it's not only possible—it's the key to consistently increasing profits and controlling your risks.

And nothing rivals the power of the VectorVest Timing Indicators. Which is why VectorVest is the only market-timing system to signal every major market turn since 1991.

Every day, VectorVest analyzes and interprets every aspect of the market's trend, then provides clear guidance on the best ways for you to benefit. It is then summarized in the Daily Color Guard Report and Special Presentation videos.

So you'll never miss a profit opportunity or be caught on the wrong side of the market again!

VectorVest's proven track record means never worrying about being caught unprepared by sudden changes in market direction... or missing red-hot profit opportunities!

jump back in before the crowd for superior profits as the market climbs higher!

The easiest way to time the market...

Successfully timing the market can seem complicated and require detailed knowledge of trends and technical analysis. But this doesn't have to be the case. There IS an easier way.

I'm talking, of course, about VectorVest.

VectorVest has helped investors of all levels of experience successfully time the market for over 29 years. Its proprietary algorithms and market timing indicators literally do the work for you.

With VectorVest, you never need to worry about missing an opportunity or being caught unprepared. Because it's the only market timing system to successfully call every major market turn since 1991. Events that caught most investors unprepared, such as...

- The surging bull market of 2003
- The devastating crash of 2007

- The follow-up Crash of 2008
- The explosive market rally of 2009
- The flash crash of 2010
- The unexpected correction of 2011
- The roller coaster rallies of 2012
- The summer sell-off of 2015
- The worst January since 2009 (2016)

... and many, many others!

In each and every case, VectorVest issued clear and unmistakable warnings and alerts... signaling to investors that market conditions were about to change.

So they were able to preserve their wealth from crashes that took millions of other investors — those without VectorVest — unawares. Investors who watched helplessly as their hard-earned wealth was mercilessly wiped out.

What's more, those investors using VectorVest didn't just safeguard their money. Thanks to VectorVest's timely signals, they were also able to jump back into the market at just the right moments!

(Continued on page 16...)

Three Steps to Safe Profits

How VectorVest saved investors from the worst Bear Market in seven decades... then helped them bank phenomenal profits by perfectly signaling the most powerful rally in 70 years!

In November of 2007, the market entered the worst bear market in 70 years. Here's how VectorVest helped investors avoid the devastating losses suffered by millions of investors...

VectorVest gave subscribers plenty of warning before the Crash of '07.

While others lost everything, VectorVest subscribers banked stellar 193% gains.

VectorVest also perfectly called the biggest rally in 70 years!

Step 1: Get to Safety BEFORE the Crash

VectorVest's proven Market Timing System warned investors to get out of the market before they were caught by the deadly Crash of 2007...

Step 2: Stay Safe and Buy Smart

The Crash of '07 signaled the beginning of the worst Bear Market of the past 70 years. Many investors lost 50% or more of their wealth. But those who followed VectorVest's "Buying Contra ETFs" strategy bought investments that rise when the market drops. And as a result, banked phenomenal 193% gains!

Step 3: Ride the Rally

On 3/6/09 VectorVest signaled investors the market was itching to rally. And repeated the signal on 3/9/09. When the market EXPLODED upwards on 3/10/09, investors who listened caught the most powerful rally in 70 years!

New to Investing or an Experienced Pro, VectorVest has you covered...

With clear, unmistakable Buy, Sell and Hold signals, it's like having your own personal stock analyst right in the comfort of your own home!

One of the best things about VectorVest is it's perfect for ANY investor. It's designed for the novice and expert alike.

No matter what your level of experience, you'll soon be successfully managing your portfolio.

VectorVest does all the hard work for you, so you'll never have to worry about feeling overwhelmed. And it gives you the best—and most user-friendly—tools in the industry. So you can...

Instantly analyze your stocks with a VectorVest WatchList!

Novice investors especially love VectorVest's clear indicators and ability to rank stocks.

For instance, the Getting Started video helps you create a "WatchList" to instantly analyze all your stocks—then shows you which to consider replacing immediately. (See sidebar on this page for more details.)

And the Model Portfolios Daily Action Plan lets you implement some of VectorVest's most popular and successful strategies in just three simple steps!

Plus, you'll find plenty of proven, easy-to-use strategies to match your investing style. Whether you prefer...

- "Buy and Hold" long-term investments...
 - Stocks paying high-yield dividends...
 - Exchange Traded Funds (ETFs)...
 - Specific sectors or industries...
 - Undervalued stocks poised for rapid growth...
- ...even strategies to profit when the market goes down!

VectorVest can also help you be a savvy, more successful investor

You also get full access to VectorVest University, a treasure trove of articles, guides and videos on virtually every aspect of investing...

Plus FREE webcasts filled with market updates, timely tips and actionable information. Including what's working

in the market today.

And don't worry. If you're ever stuck, customer support is just a friendly toll-free phone call away!

Like to do your own research? VectorVest makes detailed analysis easier and faster than ever!

Experienced investors love VectorVest, too. And not just because it's the only system to correctly call every major market move since 1991.

Your 5 Week Trial is just \$9.95!

The Fastest Way to Boost Your Performance...

Without a doubt, the fastest way to boost performance is the WatchList tool. It ranks your stocks from best to worst.

Simply enter your stocks and in seconds they'll be analyzed and sorted by the best combination of Value, Safety and Timing (VST-Vector).

Then click the Relative Timing (RT) column to re-sort for momentum, which will list your stocks with the weakest Relative Timing at the bottom.

Stocks with RT values below 1.0 are in downtrends and hurting your portfolio. Consider selling them to immediately help stem your losses. Then replace them with top VST-Vector stocks when it's safe to buy.

Create your own WatchList by trying VectorVest Risk-Free for 5 Full Weeks —only \$9.95!

(See page 18 for details!)

WatchList Tool

RT DESC, Symbol ASC Top 75 10 Four				
Company	Symbol	RT	REC	
Hawaiian Hldgs	HA	1.90	B	
Skyworks Soltn	SWKS	1.77	B	
Southwest Air	LUV	1.57	B	
Pilgrims Pride	PPC	1.21	B	
VipShop Hldgs	VIPS	1.17	H	
Nike Inc. B	NKE	1.15	H	
Johnsn & Jhns	JNJ	1.07	H	
Bitauto Hldg	BITA	0.90	H	
Intercept Pharm	ICPT	0.50	S	
ReWalk Robotics	RWLK	0.42	S	

Quickly improve your portfolio's performance with VectorVest's WatchList tool!

"Great tool... Easy to understand!"

I've used VectorVest since 2008. It's a great tool to understand the overall trend and health of the market, and to identify specific stocks and ETFs. It's awesome!

— S. T., Oakville, Ontario

"Highly recommended!"

"I've subscribed to many services in the past. VectorVest is now the only one I use. I highly recommend it!"

— D.W., Comox, BC

With VectorVest, you get the industry's best analysis, along with customizable graphs, searches, and news feeds... automatic support and resistance levels... even powerful back-testing capabilities.

So VectorVest can be as simple or as technical as you

wish it to be.

Use it to perform your own analysis... create and execute your own strategies... even day trade or find the best option trades. Just give it a try.

You'll wonder how you ever invested without it!

Nothing lets you grow your portfolio faster than VectorVest!

There's nothing quite like the thrill of watching your investments double... triple... even QUADRUPLE in value. And VectorVest makes this easier than ever!

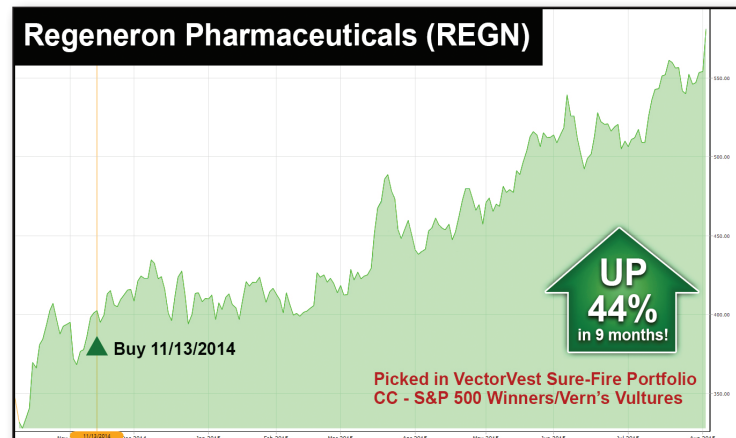

Each day, VectorVest's proven algorithms analyze and rank more than 7,600 stocks and ETFs for Value, Safety and Timing..

Factor in VectorVest's specialized strategies, and you're looking at a perfect storm of unstoppable profits!

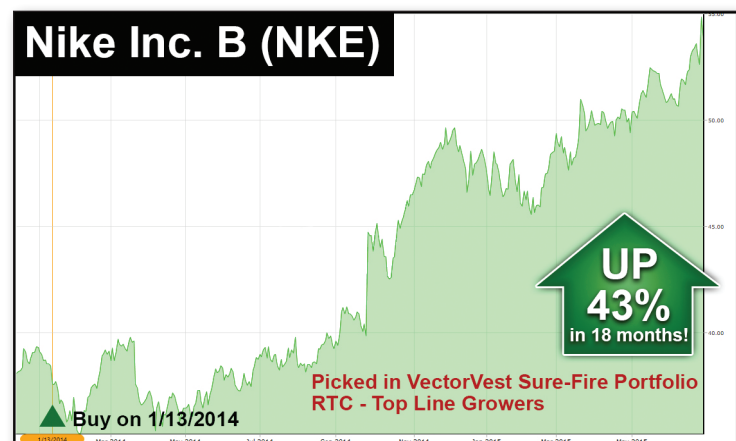

For example...

- **DTO:** Up 52% in 2 months! (PowerShares Crude Oil Dbl Contra ETF, 12/9/15–2/5/16)
- **SWKS:** Up 43% in 6 months! (Skyworks, 1/2/15–7/2/15)
- **CHAD:** Up 16% in 2 months! (Direxion Share Contra ETF - China, 12/9/15–2/5/16)
- **ABX:** Up 50% in 2 months! (Barrick Gold, 12/9/15–2/5/16)
- **CNC:** Up 42% in 6 months! (Centene Corp., 1/2/15–7/2/15)
- **REGN:** Up 44% in 9 months! (Regeneron Pharmaceuticals, 11/13/14–8/4/15)
- **NKE:** Up 43% in 18 months! (Nike Inc. B, 1/13/14–2/5/16)

Of course, even VectorVest can't eliminate every loser, but we can help you minimize them with proprietary algorithms developed and refined over 29 years. VectorVest can help you bank bigger winners, more often.

VectorVest's Sure-Fire Portfolio identified Regeneron Pharma (REGN) on 11/13/14. In just nine months, it was up 44%!

VectorVest's Sure-Fire Portfolio returned Nike Inc. B (NKE) on 1/13/14. Soon after, it exploded higher, gaining 43% in 18 months.

Prefer to Play it Safe? Here's How VectorVest Beat the Flash Crash of 2010...

In May 2010, a sudden market collapse caught millions off guard. But investors using VectorVest were ready.

On 5/3/10, VectorVest warned prudent investors to avoid buying stocks, and advised aggressive investors to play the market with a downside bias.

Conditions worsened, so on 5/4/10 VectorVest issued an even stronger warning. And on 5/5/10, VectorVest warned investors to go short or stay on the sidelines.

The next day, the market collapsed.

While others suffered massive losses, those following VectorVest's signals were perfectly positioned for both safety and profits!

VectorVest saved investors from the Flash Crash of 2010, plus helped position them for major profits!
